Roach Treatment Sheet:

(Please Refer to roach prep sheet to prepare before treating)

- When distributing bait Dots should be 12 inches apart
- Treatment areas: Stove, refrigerator (behind and the gaskets around doors), shelves, cabinets, backsplash, window/ doorframes, microwave, coffee maker, cable boxes, television, computer tower/ monitor, any vents or wall heating units, furnace, and hot water heaters.
- Example: A 3 bedroom house with moderate infestation should only use 1/3 tube per treatment. Dots of bait should be very small.
- One week later re-prep. and re-treat!

Note: *When using bait the smaller the dot the more effective the treatment*
